

Are you a mental health clinician?

Do you have experience providing services to people with intellectual and/or developmental disabilities?

We are having a **focus group** to learn more about mental health services for people with intellectual and/or developmental disabilities.

- What did you do that helped your clients with disabilities?
- What is hard about providing mental health services to clients with disabilities?
- What should a peer-delivered mental health intervention for young adults with intellectual and/or developmental disabilities look like?

Your opinion is important!

What will happen during the focus group?

- The focus group is 1.5 hours long
- The focus group will be online.
- You will talk with other mental health clinicians and a researcher about your experiences.
- Everything you say is private.
- You will receive a \$15 “thank you” gift card after the focus group.
